M. Furqan Ul Haq

Senior Flutter Developer | Mobile Application Engineer (Flutter · iOS · Android)

Lahore, Pakistan | (+92) 332-8890878 | mfurqanulhaq1997@gmail.com

LinkedIn: linkedin.com/in/mfurqanulhaq | GitHub: github.com/mfurqanulhaq

PROFESSIONAL SUMMARY

Mobile application developer with 7+ years of experience and 20+ production apps shipped to the App Store and Google Play, including 4+ years of hands-on production Flutter development. Strong native foundation in Swift (iOS) and Kotlin/Java (Android). Experienced in scalable app architecture (Clean Architecture, feature-based modules), state management with BLoC, Provider, Riverpod, and GetX, REST API integration, real-time features (WebSockets, Twilio, Agora, live GPS), payments, and end-to-end release management. Works closely with backend and product teams in Agile sprints.

TECHNICAL SKILLS

Flutter & Dart: Flutter (iOS & Android), Dart, reusable widget and UI component libraries, Material Design and Human Interface guidelines

State Management: BLoC, Provider, Riverpod, GetX

Architecture: Clean Architecture, Feature-Based Architecture, MVC, MVP, MVVM, VIPER

API Integration & Backend Services: RESTful APIs, JSON, third-party API integration, Postman

Performance & Data Handling: Paginated Firestore feeds, local caching and offline-first persistence, battery-efficient background location, crash log analysis and debugging

Real-Time Communication: WebSocket/Sockets, Twilio, Agora, WebRTC, group calling, screen sharing, Picture-in-Picture

Firebase & Notifications: Firebase Auth, Firestore, Realtime Database, Cloud Functions, FCM push notifications, social logins (Google, Apple, Facebook)

Maps & Location: Google Maps SDK, live GPS tracking, Traccar server integration

Payments & Subscriptions: Stripe, PayPal, Apple In-App Purchases, Google Play Billing

Native Development: Swift, UIKit, Kotlin, Java

Databases & Tools: SQLite, Hive, Realm, Room, SharedPreferences, Android Studio, Xcode, VS Code, Git, SourceTree, CocoaPods, Jira, App Store and Play Store deployment

PROFESSIONAL EXPERIENCE

Software Engineer – Flutter (Senior) | Teraception, Gulberg, Lahore *Dec 2021 – Present*

- Architect and build cross-platform Flutter applications from concept to production, using Clean Architecture, feature-based modular structure, and BLoC, Provider, Riverpod, and GetX for state management.
- Integrate RESTful APIs and Firebase backends (Auth, Firestore, FCM), working with backend engineers and product managers in Agile/Scrum sprints.
- Built live GPS tracking with Google Maps and a Traccar server, enabling real-time communication with hardware devices for a pet and asset tracking platform.
- Implemented audio/video calling, group calling, and screen sharing with Twilio and Agora, including permission handling and background session management.
- Implemented subscription and one-time payment flows with Stripe, Apple In-App Purchases, and Google Play Billing in production apps.
- Built socket-based real-time channels and Firebase-backed synchronization, achieving sub-second data sync across clients.
- Lead App Store and Google Play release cycles, including code signing, build configuration, post-launch monitoring, and bug resolution.

Software Engineer – Mobile Applications | Trigonsoft, DHA, Lahore *May 2020 – Dec 2021*

- Developed iOS and Android apps in social media, service marketplace, and e-commerce domains using Swift, Kotlin, and early Flutter.
- Designed and consumed RESTful APIs with local caching (SQLite, SharedPreferences) to deliver reliable offline-first experiences.
- Owned the app lifecycle from feature development to production debugging, reducing crash rates and improving stability; built reusable UI component libraries following platform design guidelines.

Junior iOS Developer | Solution Soul, Gulberg, Lahore *Jul 2019 – May 2020*

- Developed and maintained 20+ small-to-mid-sized native iOS apps with Swift and UIKit across productivity, utilities, and lifestyle categories.
- Built pixel-accurate UI from Figma/Sketch designs and integrated third-party REST APIs through clean networking layers; improved stability through testing and crash log analysis before App Store submissions.

SELECTED PROJECTS

Pet & Asset Tracking Application | Flutter · Google Maps · Traccar · Firebase · WebSocket

- Streamed hardware tracker sensor events through a custom Traccar server and WebSocket pipelines onto an interactive Google Maps interface for real-time monitoring.
- Optimized background location services for battery efficiency while maintaining continuous tracking accuracy.

Real-Time Communication Suite | Flutter · Twilio · Agora · WebRTC

- Delivered audio/video, group calling, and screen sharing across multiple consumer Flutter apps, handling Picture-in-Picture, call reconnection, and Android foreground-service behavior.
- Achieved stable group sessions with 10+ concurrent participants through adaptive bitrate configuration.

Rental & E-Commerce Application | Flutter · Stripe · Firebase · Real-Time Chat

- Built a rental marketplace with product listings, booking workflows, Stripe payments, and in-app chat.
- Designed a scalable Firestore data model supporting real-time inventory updates and transaction state management.

NOIR Space BH – Social Media App | Flutter · Firebase · Agora · Google Maps

- Built a social platform with posts, real-time chat, audio/video calling, and location-based content discovery.
- Implemented a Firestore-backed real-time feed with pagination, content moderation hooks, and FCM push notifications.

Sonder – Trip Tracking Social App | Flutter · Google Maps · Firebase

- Developed a social app to record, visualize, and share travel routes on Google Maps, with followers, media uploads, and activity feeds synchronized in real time through Firestore.

EDUCATION

Bachelor of Science in Computer Science | University of Sargodha, Sargodha, Pakistan *2015 – 2019*

CGPA: 3.47 / 4.00. Coursework: Data Structures & Algorithms, OOP, Mobile Application Development, Software Engineering, Database Systems
